European Journal of Operational Research 53 (1991) 405–406
North-Holland

Contents Volume 53

1 Efficient models for the facility layout problem
S.S. Heragu and A. Kusiak
14 The zone-constrained location problem on a network
O. Berman, D. Einav and G. Handler
25 Heuristics for the *p*-hub location problem
J.G. Klincewicz
38 Computational results from a new Lagrangean relaxation algorithm for the capacitated plant location problem
J. Barcelo, E. Fernandez and K.O. Jörnsten
46 Opportunity-based block replacement
R. Dekker and E. Smeitink
64 Computing K-shortest path for nuclear spent fuel highway transportation
S.-P. Miaou and S.-M. Chin
81 A parametric approach to solving bicriterion shortest path problems
J. Mote, I. Murthy and D.L. Olson
93 A probabilistic FLEET model with individual vehicle reliability requirements
C. ReVelle and V. Marianov
106 A binomial contingent claims model for valuing risky ventures
P. Ritchken and B. Kamrad
119 Level scheduling to minimize schedule length on lots of unit-time jobs
M.B. Richey
122 OR Software, *H. Thiriez (ed.)*
124 EURO Bulletin, *Ph. Van Asbroeck (ed.)*

131 Multilevel capacitated lotsizing complexity and LP-based heuristics
J. Maes, J. McClain and L. Van Wassenhove
149 FLEXSIM: A flexible manufacturing system simulator
E. Gelenbe and H. Guennouni
166 A nonlinear goal programming model for multistage, multiobjective decision problems with application to grouping and loading problem in a flexible manufacturing system
P. Kumar, N. Singh and N.K. Tewari
172 Cyclic service queues with very short service times
P. Kubat and L.D. Servi
189 A data envelopment analytic model for assessing the relative efficiency of the selling function
J. Mahajan
206 Incorporating the uncertainty of decision judgements in the analytic hierarchy process
M. Sajjad Zahir
217 Beyond preference information based multiple criteria decision making
E.E. Rosinger
228 Single-sided economic screening models incorporating individual unit misclassification error and risk preference
H. Moskowitz, R. Plante and H.-T. Tsai
244 Planar exponential random walk with restricted angles of turn
B.W. Conolly and D.M. Roberts
254 OR Software, *H Thiriez (ed.)*

257 The maximum flow problem: A max-preflow approach (*Invited Review*)
G. Mazonni, S. Pallottino and M.G. Scutellà
279 Road planning in rural areas of developing countries
G.A. Makarachi and H.T. Tillotson
288 On the riskiness of the world's stock markets
M.J. Malkamäki, T. Martikainen and J. Perttunnen
297 A demand-to-manufacturing-requirement model based on predefined configurations
J.-M. Proth and X.-L. Xie
309 Cost function for a periodic reorder-point system with time dependent replenishment costs
K.F. Matta

317 Single machine scheduling problem with a common deadline and resource dependent release dates
A. Janiak
326 The complexity of shop-scheduling problems with two or three jobs
Yu.N. Sotskov
337 Cardinal ranking of alternative actions: extension of the PROMETHEE method
D. Diakoulki and N. Koumoutsos
348 Application of fuzzy theories to multiple objective decision making in system design
A.K. Dhingra and H. Moskowitz
362 Some bounds on probability of error in fuzzy discrimination problems
L. Pardo and M.K. Menendez
371 A nonlinear programming approach to the parameter design problem
Y. Fathi
382 Approximate analysis of a closed fork/join model
Y.C. Liu and H.G. Perros
393 The arc partitioning problem
L. Bodin and L. Levy
402 A linear time algorithm for the maximum capacity path problem
A.P. Punnen
405 Contents Volume 53
